

VERSATILITY

BY RUSKIN

S3G Backdraft Damper

Ruskin's new S3G all galvanized backdraft damper provides you with the installation versatility to match the most demanding commercial application. Whether you need a channel or flanged frame, horizontal or vertical orientation, gravity counterbalanced or motorized operation, Ruskin builds this damper to your specific requirements. Superior weather resistance, high performance with velocities up to 3000 feet per minute and fast delivery makes the S3G the versatile complement to your fan system.

Ruskin's versatility in products and services make it happen for you – our customers. For more information about Ruskin's S3G and our complete line of dampers and louvers, contact your local Ruskin representative.
