

# RUSKIN SAVES ENERGY

*Balancing energy savings  
and ventilation requirements*

*is a serious challenge facing today's engineers. International Codes, ANSI/ASHRAE Standard 62.1 and the Green Building Council all define and require proper ventilation in buildings. According to the EPA website, indoor air quality is among their top four concerns. But, still half of all schools have reported poor IAQ<sup>1</sup>*

*How do you know you are getting the correct ventilation to building occupants?*

*The answer is Ruskin's Air Measuring Dampers and Louvers. Ruskin products accurately monitor and control ventilation air 100% of the time, ensuring proper ventilation while saving energy dollars.*

***Ruskin's Air Measuring Dampers and Louvers...  
Never too much air...Never too little...ALWAYS JUST RIGHT!***

*To learn more about Ruskin's air measuring solutions, or to locate a representative nearest you, visit our website at [www.ruskin.com](http://www.ruskin.com) or call us at **(816) 761-7476**.*
