

CFD7T-IB6

Ceiling Fire Dampers

UL Classified Radiation Dampers for Wood Truss Construction

APPLICATION

The CFD7T-IB6 is a UL Classified Ceiling Fire Damper that is UL listed for installation in wood truss floor/ceiling and roof/ceiling designs L528, L546, L558, L574, L585, L586, L592, P533, P538, P545, P548, P580 and H502. These designs are also similar to the fire resistance rated ceiling construction described in the International Building Code. Unlike other ceiling dampers designed and tested for wood truss applications, the CFD7T-IB6 is supplied with an R6 duct lined insulated steel plenum box with side round collar. The CFD7T-IB6 is also UL approved for installation with duct connection below the membrane penetration.

CFD7T-IB6 is designed to accept a grille with an OBD up to a maximum of 2 1/2" in depth. The CFD7T-IB6 is also designed to include an optional bottom extension for ceiling membrane penetration where the grille/diffuser is in an architectural ceiling below the fire rated ceiling assembly.

The CFD7T-IB6 is constructed with a 1 1/2" (38) factory roll formed plaster flange to connect the Grille/Diffuser in to.

STANDARD CONSTRUCTION

Frame	Galvanized steel (in gauges required by UL listing R8039)
Fusible Link	165°F (74°C) is standard. 212°F (100°C) is available at no additional cost
Plenum Box	26 gauge galvanized steel
R6 Insulation	Johns Manville Linacoustic RC
Minimum Size (Damper Sizes)	5"w x 5"h (127 x 127)
Maximum Size (Damper Sizes)	18"w x 18"h (457 x 457) and Maximum of 1 sq. ft.

UL Classified ULC Listed

UL555C Listing R8039

Model CFD7T-IB6 the requirements for fire/radiation dampers established by:

- ▶ National Fire Protection Association NFPA Standards 80, 90A, 92A, 92B, and 101
- ▶ ICC International Building Codes
- ▶ CSFM California State Fire Marshal Listing (3225-0245:0123)

NOTE:
- Dimensions shown in parentheses () indicate millimeters.

CFD7T-IB6 WITH R6 INSULATED STEEL PLENUM BOX

The CFD7T-IB6 damper can be supplied with a factory R6 duct lined installed Steel plenum box.

SUGGESTED SPECIFICATION

Furnish and install, at locations shown on the plans, ceiling fire dampers tested and listed for wood truss construction including UL ceiling designs L528, L546, L558, L574, L585, L586, L592, P533, P545, P548, P580 and H502. Ceiling fire dampers shall be produced in an ISO 9001 certified factory. All installations shall be in accordance with manufacturer's published installation instructions and do not require additional field installed insulated boots, boxes or plenums to meet the UL listing.

Ceiling penetrations should be located between adjacent truss and RC or Furring channels. The entire system shall be UL classified and ULC Listed for use in wood truss applications. System proposed for installation must be equivalent in all respect to Ruskin Model CFD7T-IB6.
