---

**Features**

- **57% Free Area.**
- **Published performance ratings based on testing in accordance with AMCA Publication 511.**
- **High performance frame system with drainable head collects and removes water to provide excellent water penetration performance.**
- **Drain gutter in each blade minimizes water cascade between blades.**
- **Architectural styling, hidden mullions allowing continuous line appearance up to 120” (3048).**
- **Aluminum construction for low maintenance and high resistance to corrosion.**
- **All welded construction.**

---

**Variations**

- **Extended sill.**
- **Hinged frame.**
- **Front or rear security bars.**
- **Filter racks.**
- **A variety of bird and insect screens.**
- **Selection of finishes: prime coat, baked enamel (modified fluoropolymer), epoxy, Acrodize, Kynar, clear and color anodize. (Some variation in anodize color consistency is possible.)**

Consult Ruskin for other special requirements.

**ElF6375DX and ElF6375DXH Drainable Stationary Louvers**

EXTRUDED ALUMINUM LOUVER

**Standard Construction**

- **Frame**: 8” (152) deep, 6063-T5 extruded aluminum. ElF6375DX – .081” (.21) nominal wall thickness. ElF6375DXH – .125” (.32) nominal wall thickness. Downspouts and caulking surfaces provided.
- **Blades**: 6063-T5 extruded aluminum. ElF6375DX – .081” (.21) nominal wall thickness. ElF6375DXH – .125” (.32) nominal wall thickness. Drainable blades are positioned at 37.5° angle and spaced approximately 5-1/4” (150) center to center.
- **Screen**: 3/4” x .051” (19 x 1.3) expanded, flattened aluminum bird screen in removable frame. Screen adds approximately 1/2” (13) to louver depth.
- **Finish**: Mill.

**Minimum Size**

12”w x 12”h (305 x 305).

**Approximate Shipping Weight**

- ElF6375DX - 4 lbs./ft.² (19.5 kg/m²)
- ElF6375DXH - 6 lbs./ft.² (29.3 kg/m²)

**Maximum Factory Assembly Size**

Shall be 75 sq. ft. (7m²) per section, not to exceed 120”w x 90”h (3048 x 2286) or 90”w x 120”h (2286 x 3048). Louvers larger than the maximum factory assembly size will require field assembly of smaller sections.

**Supports**

Louvers may be provided with rear mounted blade supports that increase overall louver depth depending on louver size, assembly configuration or windload.

Consult Ruskin for additional information.

---

**Supports**

- **CMA Construction**: Standard integral flange.
- **Blades**: ElF6375DX – .081” (.21) nominal wall thickness. ElF6375DXH – .125” (.32) nominal wall thickness. Drainable blades are positioned at 37.5° angle and spaced approximately 5-1/4” (150) center to center.
- **Screen**: 3/4” x .051” (19 x 1.3) expanded, flattened aluminum bird screen in removable frame. Screen adds approximately 1/2” (13) to louver depth.
- **Finish**: Mill.

SUGGESTED SPECIFICATION

Furnish and install louvers as hereinafter specified where shown on plans or as described in schedules. Louvers shall be stationary drainable type with drain gutters in each blade and drain outlets in jams and mullions. Louvers shall have a minimum of 57% free area based on a 48" wide x 48" high (1219 x 1219) size. Stationary drainable blades shall be contained within a 6" (150) frame. Louver components (blades, jams, sills, blades, & mullions) shall be factory-assembled to the louver manufacturer. Louver blades for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall limit span between visible mullions to 10-fet (3) and shall incorporate structural supports required to withstand a wind-load of 20 lbs. per sq. ft. (966Pa) (equivalent of a 90 mph wind (145KPH) and – specifier may substitute any loading required).

PERFORMANCE DATA

AMCA Standard 500 provides a reasonable basis for testing and rating louvers. Testing to AMCA 500 is performed under a certain set of laboratory conditions. This does not guarantee that other conditions will not occur in the actual environment where louvers must operate.

The louver system should be designed with a reasonable safety factor for louver performance. To ensure protection from water carryover, design with a performance level somewhat below maximum desired pressure drop and .01 oz./sq. ft. of water penetration.

WATER PENETRATION

Test size 48" wide x 48" high (1219 x 1219)

Beginning point of water penetration at .01 oz./sq. ft. is 1023 fpm (312 m/min).

PRESSURE DROP

Ruskin Manufacturing Company certifies that the ELF6375DX and ELF6375DXH Louvers shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance ratings and water penetration ratings only.
**SUGGESTED SPECIFICATION**

Furnish and install louvers as hereinafter specified where shown on plans or as described in schedules. Louvers shall be stationary drainable type with drain gutters in each blade and downspouts in jambs and mullions. Louvers shall have a minimum of 57% free area based on a 48" wide x 48" high (1219 x 1219) size. Stationary drainable blades shall be contained within a 6" (150) frame. Louver components (head, jambs, sills, blades, & mullions) shall be factory assembled by the louver manufacturer. Louver frame for shipping shall be built up by the contractor from factory assembled louver sections to provide overall sizes required. Louver design shall limit span between visible mullions to 10-feet (3) and shall incorporate structural supports required to withstand a wind load of 20 lbs. per sq. ft., (966Pa) (equivalent of a 90 mph wind [145KPH] and – specifier may substitute any loading required).

**PERFORMANCE DATA**

AMCA Standard 500 provides a reasonable basis for testing and rating louvers. Testing to AMCA 500 is performed under a certain set of laboratory conditions. This does not guarantee that other conditions will not occur in the actual environment where louvers must operate.

Louvers shall be Ruskin Model ELF6375DX or ELF6375DXH extruded 6063T5 aluminum construction as follows:

- **Frame:** 6" (150) deep. ELF6375DX – .081" (.2) nominal wall thickness. ELF6375DXH – .125" (.3) nominal wall thickness.
- **Blades:** ELF6375DX – .081" (.2) nominal wall thickness. ELF6375DXH – .125" (.3) nominal wall thickness. Drainable blades are positioned at 37½° angle and spaced approximately 54" (150) center to center.
- **Screen:** ½" x .051" (19 x 1.3) expanded, flattened aluminum in removable frame.
- **Finish:** Select finish specification from Ruskin Finishes Brochure.

Published louver performance data bearing the AMCA Certified Ratings Seal for Air Performance & Water Penetration must be submitted for approval prior to fabrication and must demonstrate pressure drop and water penetration equal to or less than the Ruskin model specified.

The louver system should be designed with a reasonable safety factor for louver performance. To ensure protection from water carryover, design with a performance level somewhat below maximum desired pressure drop and .01 oz./sq. ft. of water penetration.

The Free Area Guide shows free area in ft² and m² for various sizes of ELF6375DX and ELF6375DXH.

Beginning point of water penetration at .01 oz./sq. ft. is 1023 fpm (312 m/min).

**PRESSURE DROP**

Ratings do not include the effect of a bird screen.

Ruskin Manufacturing Company certifies that the ELF6375DX and ELF6375DXH Louvers shown herein is licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 511 and comply with the requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance ratings and water penetration ratings only.

ELF6375DX and ELF6375DXH DRAINABLE STATIONARY LOUVERS
EXTRUDED ALUMINUM LOUVER

### STANDARD CONSTRUCTION

**FRAME**

- 6" (152) deep, 6063T extruded aluminum. ELF6375DX – 0.081" (2.1) nominal wall thickness. ELF6375DXH – 0.125" (3.2) nominal wall thickness. Downspouts and caulking surfaces provided.

**BLADES**

- 6063T extruded aluminum. ELF6375DX – 0.081" (2.1) nominal wall thickness. ELF6375DXH – 0.125" (3.2) nominal wall thickness. Drainable blades are positioned at a 37\(^{1/2}\)° angle and spaced approximately 5\(^{1/2}\)" (130) center to center.

**SCREEN**

- 1/4" x .051" (19 x 1.3) expanded, flattened aluminum bird screen in removable frame. Screen adds approximately 1/2" (13) to louver depth.

**FINISH**

- Mill.

**MINIMUM SIZE**

- 12"w x 12"h (305 x 305).

**APPROXIMATE SHIPPING WEIGHT**

- ELF6375DX – 4 lbs./ft.\(^2\) (19.5 kg/m\(^2\))
- ELF6375DXH – 6 lbs./ft.\(^2\) (29.3 kg/m\(^2\))

**MAXIMUM FACTORY ASSEMBLY SIZE**

- Shall be 75 sq. ft. (7m\(^2\)) per section, not to exceed 120"x 90" (3048 x 2286) or 90"x 120" (2286 x 3048).

**LOUVERS LARGER THAN THE MAXIMUM FACTORY ASSEMBLY SIZE WILL REQUIRE FIELD ASSEMBLY OF SMALLER SECTIONS.**

**SUPPORTS**

- Louvers may be provided with rear mounted blade supports that increase overall louver depth depending on louver size, assembly configuration or windload.

Consult Ruskin for additional information.

### FEATURES

- 57% Free Area.
- Published performance ratings based on testing in accordance with AMCA Publication 511.
- High performance frame system with drainable head collects and removes water to provide excellent water penetration performance.
- Drain gutter in each blade minimizes water cascade between blades.
- Architecturally styled, hidden mullions allowing continuous line appearance up to 120" (3048).
- Aluminum construction for low maintenance and high resistance to corrosion.
- All welded construction.

### VARIATIONS

Variations to the basic design of these louvers are available at additional cost. They include:

- **Extended sill.**
- **Hinged frame.**
- **Front or rear security bars.**
- **Filter racks.**
- **A variety of bird and insect screens.**
- **Selection of finishes: prime coat, baked enamel (modified fluoropolymer), epoxy, Acrodize, Kynar, clear and color anodize. (Some variation in anodize color consistency is possible.)**

Consult Ruskin for other special requirements.
