RUS-M24(-S) Electric 24 Volt Control Damper & Louver Actuator

DIRECT COUPLED SPRING RETURN

DESCRIPTION

Ruskin model RUS-M24(-S) electric On/Off spring return actuator designed for factory mounting on dampers and operable louvers. Actuators can be mounted directly to a damper or louver shaft from 5/16 to 5/8 inch (8 to 16 mm) diameter with a universal clamp. An optional line voltage auxiliary switch indicates an end-stop position or performs switching functions within the field selected 0° to 90° rotation range.

FEATURES

- Designed specifically to operate damper and operable louver applications up to the square footage face area listed below.
- Reversible mounting design simplifies installation and enables the actuator to be spring return in either direction.
- Electronic stall detection through entire rotation range extends life by deactivating the motor when an overload condition is detected.
- 5 Year factory warranty
