Added options groups to Air Measurement Models AMS050 and AiQ-TD series.

### LEADS Program Refresh

Ruskin is excited to announce the new LEADS interface program. Tentative release January 2023.

### ELF6375DXD Wind Load Enhancement

100 psf wind load will be selectable in Selection Navigator. Tentative release January 2023.

A screenshot of a software interface titled "Shipping Address". It includes a "Contact List" section with a dropdown menu currently showing "select...". Below that is a "Ship Address Details" section with three input fields: "\*Ship To" (30), "Address Line 2" (30), and "\*Zip Code" (10). Each field has a small red asterisk on the left and a character count in parentheses on the right.

### Contact List Search on Order Header

This release will enable users to search their contact list and bring the shipping details into the Order Header. Tentative release January 2023.
