ORDERING INFORMATION

HOW TO ORDER

Ductless Installation

Order "actual size" with **standard** frame. Damper installs over diffuser neck.

Steel Duct Installation

Order "deduct 1/4" (6)" with **standard** frame. Damper installs inside duct.

Flex Duct Installation

Order "actual size" with **extended** frame. Damper installs over diffuser neck; flex duct installs over damper.

UL Listed Fusible Volume Adjustment Option

The standard, fusible link can be replaced with a simple mechanism that permits adjustment of damper blades to balance airflow. A standard $\frac{3}{16}$ " (5) hex (Allen) wrench is used for adjustment. In fire conditions, the damper closes regardless of volume setting. This feature must be added to the damper at fabrication. The CFD4W requires 2 volume adjustments. 165°F or 212°F (74°C or 100°C) (specify temperature) fusible volume adjustment options are available. **Caution: Volume Adjust hangs below a rectangular damper $1\frac{1}{8}$ " (29).**
