The online Ruskin Validator demo is provided so that you may better familiarize yourself with the Validator system in a hands-on approach. While the full demo is available for you to use, three common tasks and scenarios are presented here to get you started. You may wish to print these instructions so that you can use the demo in full-screen mode and reference this page more easily.

Manually Validate a Damper

- Log on to the demo
- Expand the left tree navigation to **Kansas City, Mo > Floor Plan**
- Click on **1ˢᵗ Floor FSD** or any of the Dampers Listed
- On the damper image, click the button **Manually Validate**
- Two yellow buttons will appear at the top of the screen, click **Accept**
- The damper image will change as the validation takes place

Schedule a Validation of All Dampers

- Log on to the demo
- Expand the left tree navigation to **Kansas City, Mo > Floor Plan**
- Click on **Schedule Validation**
- In the schedule graphic you should be able to select month day and time in schedule 1.
- Pick a time three to five minutes ahead of current time displayed.
- Validation of all dampers will follow and can be viewed on the riser diagram, the floor plan, or each damper graphic as Validation takes place.

Generate a Report

- Log on to the demo
- Expand the left tree navigation to **Kansas City, Mo > Floor Plan**
- Click on **Floor Plan**
- At the top of the screen click the **Reports** button (not the pull down arrow)
- **View** and **Options** tabs will appear, select **Options**
- Click the **Run** button.
- This will generate a report for all the dampers in the system, documenting all activities and alarms that have occurred on the system.

If you need further assistance or information with Ruskin Validator, please contact the Ruskin Fire & Smoke Dampers Sales team by calling 816.761.7476.
